MAREK STANKIEWICZ

Junior Frontend Developer

TECHNOLOGIES

HTML, CSS, JavaScript

TypeScript

React, Redux Toolkit

TailwindCSS, Bootstrap

NodeJS, Express

Git, GitHub, DevTools

RestAPI

Responsive Web Design

SOFT SKILLS

Fast Learner

Good Communication

Time Management

Problem Solving

Googling

LANGUAGE

Polish

English

ABOUT ME

Enthusiastic and self-improvement-driven Junior Frontend Developer. Proficient with HTML, CSS, and JavaScript, now I focus on honing my skills with libraries like React, TypeScript, or TailwindCSS. I make sure that my code is clean and easy to understand. I love learning new technologies and I'm looking forward to working with experienced developers.

WORK EXPERIENCE

2015 - 2023
Allegro, self-employed
Digital Marketing Manager
My responsibilities were:
- creating descriptive and eye-catching listings,
- building professional relations with clients,
- organizing transport logistics,
- managing finances of the account,
- operating on a strict time limit and meeting deadlines,

EDUCATION

IT Technical School
ZSTiO Gorzów Wielkopolski
2009 - 2013

PROJECTS

FAKETFLIX

https://faketlix.vercel.app/

Fullstack clone of Netflix, data is fetched from themoviedb.org API, personal profile settings, plan to watch and favorite movies are stored via Firestore. Added a pagination system that will fetch data on scroll. Authentication is provided by Firebase.

INTERESTS

Cooking

Video Games

Walks/playing
with my dog

Movies and TV
Shows

Twitch/Youtube

Social Media

BOOKORD

https://bookord.web.app/

A real-time chat application that I'm currently working on. The app was built with React.js framework using Vite, Authentication is handled by Firebase Authentication, and data is stored on a database provided by Cloud Firestore. This project allowed me to learn how to send and fetch data from the database.

THE MARKET

https://the-market-beryl.vercel.app/

A FullStack MERN application with JWT Authentication. The project is a Work In Progress at the moment. It's basically a market website where users can post their listings like Ebay or Amazon.

SPACE EXPLORATION IDLE

https://space-exploration-idle.vercel.app/

An Idle/Incremental game that I'm working on. Click buttons to gain resources, and unlock new upgrades and new content. Used this project to learn Redux Toolkit which handles all game states.

IMAGE GALLERY

https://image-gallery-beta-woad.vercel.app/gallery

A Fullstack Image Gallery App. Upload and storage are provided by Cloudinary, coded in NextJS. Cloudinary adds an option to apply filters to an image, including generative fill which will expand an image with AI-generated content.

FURNITURE SHOP

https://furnitureshop-ochre.vercel.app/

A simple e-commerce App. Browse furniture, add items to cart, view individual product pages. App is coded in React, TypeScript and TailwindCSS with React Routes and some framer-motion animations.

Source code for all of those projects and a few more are available on my GitHub. Also made some user scripts that have been installed by people hundreds of times:
